

Arline Mfg. and its subsidiary Trico Specialty Films, are proud to announce that we have completed our recertification audit and have maintained our ISO 9001:2015 certification. ISO 9001:2015 is an internationally recognized standard that helps to ensure that our products meet the needs of our customers through an effective quality management system or QMS. It is the most widely used QMS standard in the world, with over 1.1 million certificates issued to organizations in 178 countries.

Our decision to work toward ISO 9001 registration in 2018, demonstrated our commitment to provide high-quality film and sheet products to our customers and our ongoing commitment to continually improve our processes.

ISO 9001 provides framework and set of principles that ensure a common-sense approach to the management of our organization to consistently satisfy customers and other stakeholders. By applying the principals of the “Process Approach” and “Risk-Based Thinking” to our processes we are in an enhanced position to deliver exceptional products and customer service time after time.

Achieving this recertification shows our continued commitment to our customers as stated in our quality policy:

“Arline/TSF’s goal is to consistently provide our customers with high quality products and exceptional customer service.

We are committed to provide a safe work environment for our employees to thrive in while complying with environmental regulations.

To achieve this we strive to continually grow and evolve our QMS to ensure compliance to ISO 9001:2015 and to exceed customer expectations.”
